- Operating Temperature 0-50° C
- 150W Power

Intel Core i7-7700HQ

This MINI PC is powered by the Intel Core i7-7700HQ, a quad-core processor based on the Skylake architecture. In addition to four CPU cores with Hyper-Threading clocked at 3.8 GHz, the chip also integrates an HD Graphics 630 GPU and a dual-channel DDR4-3200 memory controller

Dual Band WIFI and Gigabit LAN

With support for 2.4Ghz and 5Ghz band, it can transmit higher amounts of data, and its naturally less congested. Gigabit LAN can improve the net speed and the performance to a large extent.

Bracket Mount

This is a small, metal reinforced bracket fabricated to affix our Luna Onyx PC to any of our Aquos Board Display Rolling Carts

Graphics

- Integrated Intel® HD 630 Graphics
- Video-outputs: HDMI & Display Port with 4K Support
