UV100 Series
Educational intelligent auto-tracking Camera

UV100 series is a dedicated intelligent auto-tracking camera,with cutting-edge technology in the field of Education informatization. It includes a lecturer camera UV100T and a student camera UV100S.

UV100 series is built-in with high speed processor, advanced image processing and analysis algorithms to track lecturers and students accurately and quickly, which is in line with the requirements of lecturer capture and remote interactive teaching.

UV100 series adopts advanced ISP technologies and algorithms, to make a vivid image quality, screen brightness uniformity, strong sense of depth, high-definition, and fantastic color rendition.

As a stable, reliable and simple machine to operate, UV100 series has full function and high performance.Also it is easy to install and maintain.

Product advantages:

- Integrated design:built-in panoramic camera, to achieve an integrated fusion of panoramic camera and tracking camera.
- Advanced tracking algorithms: the use of advanced human detection, locking and tracking image processing, analysis algorithm to ensure the target tracking steady, accurate and fast.
- Strong anti-interference ability: Once the tracking target is locked, not affected by the disturbances of other moving objects and projectors etc.
- Smooth tracking:The sensitivity of action can be adjusted.Tracking target's small movement or gestures will not cause camera's mis-operation.
- Video image auto adaptation: Based on the distance of tracking target, the tracking camera will automatically zoom and the video image will always maintain the appropriate size and proportion.
- Strong environmental adaptability:The tracking performance is not affected by classroom's size, shape and seating arrangement.
- Ultra wide dynamic exposure function:to completely avoid the problem of tracking target darken under the strong light background of projectors etc.
